Landon Uthke Benefit

On October 23, three year old Landon Uthke was injured in a lawn tractor accident at his home. As a result of the accident, Landon's left leg had to be amputated just above the knee. Quite the little trooper, Landon is quickly adjusting to changes in his lifestyle. Though parents Kevin and Petra Uthke are quietly thankful to have their son home with them, and reluctant to ask for assistance, the extraordinary medical expenses have understandably put a strain on the family budget. Landon is now a healthy growing boy, but will need a number of prosthetic limbs designed and fitted in the years to come. Family and friends are hosting a fundraiser to establish an account that will assist with Landon's continued medical care.
